

Line of sight separation from the data center to the desk. NSA/NIAP certified SKVM in Zero Client enclosure.
All-In-One Multiple Security Level PCoIP Solution

**ClientCube Secure
Multiple Security Domains**

KEY FEATURES

Monitor Connections
2 x DP/HDMI

Max Resolution
Client Dependent (4K60)

Other Ports
3 x USB: Keyboard, Mouse and CAC Reader
1 x 3.5mm Speaker
Remote/Desktop Control Unit

TECHNICAL SPECS

Weight
28 pounds fully configured

Dimensions
4.25" (H) x 12" (L) x 20" (W)

Power
Power Input: AC 100-240 (C14)
Power Internal: AC + DC 12 V

Environment
Stationary office, home office installation, 0° to 35°

MARKET LEADING INNOVATIONS

The Secure KVM included with ClientCube Secure, features unidirectional data flow to prevent upstream USB intrusion; high retention USB connectors to eliminate unexpected cable disconnections; illuminated and color-coded port indicators.

Part Number	Part Description
G0900437	Model ClientCube Secure

RevM07112022

BENEFITS

Delivers a full-quality computing experience to VMware Horizon® desktops and PCoIP® Blade PC workstations

Enables CAC and Smart Card switching between 2 zero clients on 8 different networks

A fully integrated solution optimized for multiple-security domain environments

ClientCube provides line of sight isolation from data center to the desktop

COMPACT, ALL-IN-ONE MULTIPLE SECURITY LEVEL PCOIP

Following in the tradition of purpose-built solutions for Federal and DoD customer, the ClearCube Secure endpoint consolidates up to 8 networks (tactical, secret, confidential and unclassified) into a small footprint device at the desktop. ClientCube Secure enables users to access multiple computers and networks using a single keyboard, monitor and mouse while maintaining physical network separation to centralized computing resources.

CONFIGURATION FLEXIBILITY

ClientCube Secure is factory integrated at ClearCube's secured facility. ClientCube Secure includes two ClearCube Zero Client devices (with options for fiber networks, copper networks, internal CAC readers and more) that are KVM switched (with audio) to one or two high-resolution displays. Secure KVM Switch technology enables multiple classified and unclassified routes to terminate at a single set of peripherals at the operator's desk while maintaining physical data separation in the datacenter. For security officers, ClientCube Secure provides line-of-sight isolation from the datacenter to the desktop.

INTEGRATED SECURE KVM

The integrated Secure KVM features true data path isolation for superior security and data protection for government agencies. A common preventive measure for thwarting attacks, KVM switching devices can securely connect peripheral devices - including audio equipment and large high-resolution displays- to switch quickly among multiple computers and networks with a single keyboard, monitor and mouse. The enclosed SKVM is fully compatible with legacy and new government systems and is listed and certified to the latest kvm testin standard (NIAP Protection Profile for PSS Ver 4.0 which exceeds EAL4 and PP PSS Ver. 4.0) The KVM Switch is specially designed to prevent peripherals from leaking information and to remain tamper-free during delivery. ClientCube Secure helps agencies save time, money, and resources by future-proofing their workstation security investments.
